

PAINT / COATING REMOVER

Apply by Brush or Roller

**INTERIOR and
EXTERIOR use**

Available in 250ml, 500ml, 1Litre.

Environmentally
SAFER

PRODUCT INFORMATION

PAL Coating Remover SPC-202 is a water based coating remover which is environmentally friendlier and safer to use than traditional chemical strippers. It is supplied in gel form for brushing or rolling. It reduces health and safety risk as it is non-flammable and contains no toxic chlorinated or caustic materials.

RECOMMENDED USE

SPC-202 can be applied on coatings adhered to metal, concrete, masonry, brick, and timber. The product is virtually odourless - no hazardous/toxic vapours which make it ideal for both internal and external projects.

HANDY FOR INTERIOR APPLICATIONS

1. APPLY SPC-202
2. PRODUCT REACTING
3. SUBSTRATE READY FOR RECOATING

ODOURLESS

NON
FLAMMABLE

NON
TOXIC

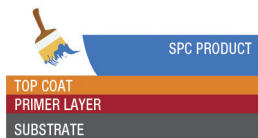

USER
FRIENDLY

BIODEGRADABLE

HOW SPC TECHNOLOGY WORKS

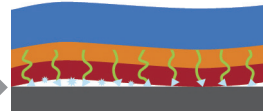

1. Use a brush or roller application.

2. Active ingredients penetrate coating.

3. SPC active components then induce "stress" on the chemical bonds of the coating.

4. SPC reaction separates coating from substrate.

5. Paint is separated from substrate by scraping and/or water washing. SPC does not add to the toxicity of the paint chips.

6. SUBSTRATE IS READY FOR COATING
Paint chips collected and disposed as dry waste. Rinse water should be treated according to local regulations.

BENEFITS OF SPC-202

Replaces toxic chlorinated and caustic products	Easy to apply and remove	Cost-effective	Water based
Virtually Odourless - no hazardous / toxic air pollutants	Reduces the volume of waste	Excellent for interior and exterior applications	Biodegradable
Reduce health and environmental risk	User friendly	Non-flammable
